MFS-320-H series

320W Constant Voltage Enclosed Switching Power Supply with PFC function

■ Features:

- Universal AC input / Full range
 - Built-in active PFC function
- Protections: Over current / Short circuit / Over Voltage / Over temperature
 - Compact size with a low 1U profile
 - LED indicator for power on
 - Wide range of operating temperature range: -30°C to +70°C
 - Operating altitude up to 5000m
 - Built-in DC Fan

- 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load, 25°C of ambient temperatur and humidity <75% RH.
- 2. Ripple & noise is measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a $0.1\mu F$ i $47\mu F$ parallel capacitor.
- 3. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability.
- 4. Case needs to be connected to the earth ($\textcircled{\blacksquare}$) of the system when the terminal equipment in operating.
- 5. The room temperature derating of 5 °C / 1000m is needed for operating altitude greater than 2000m.
- 6. Power supply is considered as component not indented to apply by end-user. Power supply meets safety and EMC standards however the final equipment with power supply must be re-quality to comply with EMC Directives.
- 7. One magnetic bead (nickel-zinc ferrite) should be coupled with the output load line during CE/RE testing.
- $8. \ All \ EMC \ items \ are \ tested \ on \ a \ metal \ plate \ (L \ x \ W \ x \ H, \ 450mm \ x \ 450mm \ x \ 3mm), \ the \ product \ should \ be \ assembled \ on \ such \ a \ plate.$
